

MUKUL PATIDAR

Java Full Stack Developer

Pune, Maharashtra, India | +91-6263273403 | patidarmukul127@gmail.com | linkedin.com/in/mukulpatidar | github.com/mukulpatidar

Professional Summary

Java Full Stack Developer targeting Java Backend / Spring Boot roles, with a web development internship and 3 projects built end-to-end using Spring Boot, Spring Security, JWT, REST APIs, MySQL, and Redis. Solved 200+ DSA problems on LeetCode (Arrays, Trees, Recursion, DP).

Technical Skills

Languages: Java, C++, SQL, JavaScript
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, MVC, JDBC, Node.js, Express
Frontend: HTML, CSS, Bootstrap, JSP, JavaScript, React, Tailwind CSS
Database: MySQL, MongoDB, Redis, Query Optimization
Tools: Git, Maven, Postman, IntelliJ IDEA, Eclipse, OOP, Collections, Multithreading, DSA

Work Experience

Web Development Intern — EncoreSky Apr 2025 – Jun 2025

- Completed a 2-month Web Development internship under Mr. Ravindra Singh Gautam, contributing to real-world web development tasks.
- Recognized for being regular, punctual, and hard-working; collaborated with team members and stakeholders on assigned work.

Projects

Real Estate Management Platform 2026

Java, Spring Boot, Spring Security, Spring Data JPA, JWT, MySQL, Redis, REST APIs, Maven, Bootstrap

- Reduced unauthorized access incidents to zero with JWT authentication and role-based authorization in Spring Security for 3 user roles (admin, agent, buyer).
- Improved property search response time by ~35% by optimizing REST APIs with advanced filtering over 10,000+ property records using Spring Data JPA.
- Built a responsive UI with Bootstrap, JSP, and JavaScript, reducing page-load complaints during testing by ~40%; configured Maven to cut manual setup time by ~60%.

Smart Contact Manager 2025

Java, Spring Boot, Spring Security, JWT, Hibernate, Spring Data JPA, MySQL, Redis, REST APIs, Maven

- Secured user data with JWT-based stateless authentication alongside Spring Security, with zero critical security issues across functional testing.
- Reduced query execution time by ~30% by replacing raw JDBC with Hibernate ORM and Spring Data JPA, improving retrieval for 5,000+ contacts.
- Delivered full CRUD with zero data loss using a normalized MySQL schema and MVC architecture.

Music Streaming Platform [Live] [GitHub] 2026

React, Redux Toolkit, Node.js, Express, MongoDB, Mongoose, Clerk, Cloudinary, Tailwind CSS, ShadCN UI, Redis

- Built and deployed a full-stack music streaming app on Vercel with audio playback, queue management, next/previous controls, and album pages with linked songs.
- Integrated Clerk authentication with session tokens, and built an admin-only panel to upload and delete songs and albums using Cloudinary.
- Developed Featured, Made for You, and Trending sections using MongoDB \$sample aggregation, with a responsive dark UI built on Tailwind CSS and ShadCN.

Education

B.Tech, Computer Science Engineering — IES IPS Academy, Indore 2022 – 2026

CGPA: 7.7

Class 12 (MP Board) — Digambar Jain Higher Secondary School, Mandsaur 76.2%

Certification

Java Programming Masterclass (Java 11 & 17) — Udemy: Collections, Multithreading, OOP design, and Lambda expressions, applied in Spring Boot projects.
